CollaDNA Serum 50mL

RETAIL

Targeted Hydration & Skin Renewal Support post bioneedling

- Supports skin renewal: A targeted blend of Sodium DNA (PDRN) and Saccharomyces Polypeptides helps support the skin's natural renewal processes.
- Hydrates and conditions: Soluble Collagen and Glycerin help maintain moisture and leave skin feeling soft and supple.
- Helps strengthen the skin barrier: Beta-Glucan supports moisture retention and helps maintain skin comfort.
- Promotes smoother-looking skin: Helps improve the feel and appearance of skin texture.
- Lightweight serum formula: Layers easily under moisturiser as part of a daily skincare routine.

KEY INGREDIENTS

- ***Soluble Collagen -*** Helps condition the skin and maintain a smooth, hydrated feel.
- ***Sodium DNA (PDRN) -*** A DNA-derived ingredient included to support the serum's skin-conditioning and renewal-focused formulation.
- ***Saccharomyces Polypeptides -*** Bioactive peptides produced through yeast fermentation that help support a smoother, more resilient-looking complexion.
- ***Beta-Glucan -*** A soothing, moisture-supporting ingredient that helps maintain hydration and support the skin's natural protective barrier.
- ***Glycerin -*** A humectant that attracts and retains moisture, helping keep the skin hydrated and supple.

USAGE RECOMMENDATIONS

AT HOME USE - Use daily AM & PM

1. After cleansing and preparing the skin, dispense one-third of a dropper and apply evenly to the face. Gently pat into the skin to aid absorption.
2. Follow with a moisturiser to help maintain hydration.
3. Use morning and evening as part of your daily skincare routine.
