

Lightening Mask

Peel off supple mask

Professional Masks

Lightening Mask is ideal to clarify complexion and to reduce pigmentation spots.

It complements and assists the transfer of the other Gernétic lightening products.

About

Key Ingredients

Phycocolloidal marine complex based on alginates derived from laminaria seaweed.

Gives its natural plasticity.

Healing and moisturizing properties..

(Alginates are phycocolloides, natural gelling agents from marine origin. These salts of the alginic acid are biopolymers that are components of the cell wall of brown algae and they allow these algae to withstand the stresses they subjected to (osmotic, light, stretching....))

Bio-based lightening complex containing mulberry, scutellaria root and grape juice.

Rich in:

- *Arbutin* decreases melanin synthesis activity.
- *Alpha hydroxy acids* (AHA) enhance the exfoliation of pigmented dead cells.
- *Flavonoids* have an anti-oxydant activity.
- *Phenyl flavones* have anti-inflammatory and antimicrobial activity.

Actions

Lightening Mask depigmenting approach is optimized through an anti-tyrosinase effect, inducing a significant decrease in melanin synthesis activity.

This results is a lighter complexion and a reduction of the pigmentation spots.

Lightening Mask: is to be used at Step #7 of the *Clarifying Treatment* after and over all the specific products.

Size: Salon 500g

Use

Skin Conditions

Suitable for dark complexion and patches of over-pigmentation.

Salon Use

Step #7 of Clarifying Treatment.

In a bowl put 3 measuring spoons of powder with 90ml of water at ambient temperature.

Mix thoroughly with a spatula for about 1 minute until smooth and even.

(It is important to take the necessary time to smooth the mask, in order to avoid lumps).

Leave the mask to stand for 2 minutes in order to allow the active ingredients to dissolve.

Then apply the mask with a spatula in a semi-thick layer to the face, neck and décolletage. (Eye area may be avoided).

Ensure to leave thick enough edges to facilitate removal.

After 10 minutes loosen the edges of the mask and remove the film with a single gesture from the neck to the forehead.

Remove any residue with Fibro Lotion.

Conservation

Close lid tightly after use.

Store in a clean, dry place, away from light and at room temperature.
