

Mineral Mask

Infusing Self-Heating

Professional Masks

Mineral Mask is made from natural gypsum, it produces heat when mixed with water. It is the most efficient mask to infuse active ingredients from the products used during a treatment.

About

Key Ingredients

Natural gypsum.

Produces an exothermic reaction that helps to infuse the active ingredients of the Gernétic products used in salon treatments.

Actions

Due to its exothermic reaction, this mask is the most efficient to infuse the active ingredients of the products used in the face, bust and body treatments.

Size: Salon 350g bag

Use

Skin Conditions

Specifically recommended for Acne and Skin Repairing Treatments, as well as all Bust and Body Treatments.

Salon Use Only

Step #7 of Skin Care Treatment

Avoid this mask on the face if your client is claustrophobic.

Apply on gauze over the specific creams.

For the face, 1/2 bag with 125 mL of water is enough.

Pour water in a bowl.

Sprinkle the powder over the water and leave it to absorb the water for 1 minute.

Mix thoroughly and apply immediately with a spatula.

Cover with polyester foil and remove after 15-20 minutes.

Face treatment: needs 1/2 bag and 125 ml water

Bust treatment: needs 1 bag and 250 ml water

Body treatment needs 2 bags and 500 ml water

See Mineral Mask, section 4, page 4.
