Soothing scalp lotion

Hair Care Line

A targeted treatment lotion for hyperséborrhoea, dandruff, eczema, scalp pruritus, hair loss, and dull, lacklustre hair.

Size: Sale 7 x 2 ml / Sample 2 x 1 ml (Not for sale)1

About

Key Ingredients

A **peptide-based active** supports tissue repair, promotes healing, and stimulates regeneration in scalps compromised by irritation and repeated scratching.

Menthol-derived molecules, including pure menthol and Menthyl PCA, provide an immediate cooling and desensitising effect while helping to control itching over the longer term. The PCA component of Menthyl PCA acts as a powerful humectant, supporting optimal hydration and accelerating the recovery of damaged scalp tissue.

Cherimoya extract helps maintain scalp homeostasis, contributing to the reduction of chronic inflammation and improved tolerance in reactive scalps.

Carrot extract, rich in antioxidants, helps neutralise free radicals and protect the scalp from environmental and external aggressors.

Actions

Intensive Soothing / Anti-Itching / Anti-Redness

A targeted therapeutic scalp infusion formulated for reactive and sensitised scalps.

Enriched with bio-active essences derived from mini phyto-factories, it delivers an immediate calming and desensitising effect. Helps significantly reduce the frequency and intensity of irritation episodes, potentially leading to their complete resolution.

Non-greasy. Non-stinging. Presented in an ampoule lotion format for precise, hygienic and convenient application.

Use

Conditions

Suitable for reactive and sensitised scalps experiencing intense redness, itching, or irritation. Recommended for conditions such as eczema or scalp psoriasis.

Home Use

Frequency: Morning and/or evening on dry or damp scalp.

Use the ampoule opener to safely open the ampoule, avoiding any risk of glass injury. Apply the full contents of the ampoule evenly across the scalp, working section by section with the applicator. Gently massage until fully absorbed. Hair can be styled immediately after application.

Intensive treatment: 1 ampoule daily for 7 consecutive days

Maintenance Treatment: 2 ampoules per week for 1 month

Long-Term Care: 1 ampoule per week for 7 weeks

Salon Use

Scalp step #4 Activation

Use the ampoule opener to safely open the ampoule, avoiding any risk of glass injury. Apply the full contents of the ampoule evenly across the scalp, working section by section with the applicator. Gently massage until fully absorbed. Hair can be styled immediately after application.
