Hyaluronic Acid Gel

30ml

pH6.0

Nimue's Hyaluronic Acid Gel is a lightweight gel ideal for use in active professional treatments to provide a moisturizing, repairing and plumping effect on the skin.

Active ingredients

primary ingredients

- Sodium Hyaluronate Cross Polymer (cross linked Hyaluronic Acid)
- LMW Hyaluronic Acid
- HMW Hyaluronic Acid

secondary ingredients

- Peptide Complex (Hydrolyzed Casein, Hydrolyzed Yeast Protein and Lysine)

Product benefits

- A product ideal to moisturise and repair the skin after active skin peeling treatments
- It forms a film on the outside of the skin thus filling wrinkles from the outside creating a plumping effect
- Penetrates the stratum corneum and attracts water into these cells
- A unique concentrated complex of peptides derived from lactic and yeast cells to repair and protect the skin against aggressions and strengthen the skin's resistance against environmental attacks

Application technique

- Dispense a small amount and massage onto the skin during Nimue Professional Treatment
- Turn the cap over and replace
- Can be used under a mask or for aftercare
