

Super Fluids

Hyaluronic Acid Super Fluid

30ml

pH6.4

A super concentrated Hyaluronic Acid based Super Fluid to customise the Nimue professional treatments. This double action Hyaluronic Acid assists with hydration and healing during any Nimue Professional Peels and Microneedling Treatments.

Active ingredients

primary ingredients

- Hydrolysed Hyaluronic Acid (accelerated skin recovery post treatment)
- Crosslinked Hyaluronic Acid (high water binding capacity to replace water in the skin)

secondary ingredients

- Dimethyl Isosorbate (penetration enhancer optimises penetration through stratum corneum)

Product benefits

- Soothing and hydrating during and after a treatment
- Immediate replacement of water in the skin
- Prevents TEWL
- Stimulation of skin defences
- Provides cellular repair and wound healing

Application technique

- For professional use only.
- Can be used in all Nimue professional treatments (*Please refer to Guidelines for Nimue Super Fluid application **)
- No more than 2 Nimue Super Fluids to be used per treatment (maximum 4ml in total)
- Should 2 Super Fluids be chosen, the main Super Fluid will focus on the client's primary concern
- It is recommended to use the appropriate Nimue-TDS™ with a Nimue professional treatment where the Super Fluids has been used to enhance treatment efficacy
- It is advised to perform at least 4 Nimue professional treatments with the same selected Super Fluid/s to maintain consistency and enhance treatment efficacy
