

# TRANSDERMAL SOLUTION

## Nimue-TDS™ problematic skin

30ml

pH5.0

The Nimue Problematic Skin Transdermal Solution controls the development of acne, reducing inflammation and redness. It boosts the skin's natural defence properties, offering anti-microbial and anti-inflammatory properties.

### Skin Classification Notes

- Acne prone and Active acne

### Active ingredients

#### primary ingredients

- Phytosphingosine (anti-microbial and anti-inflammatory)
- Mirabilis Jalapa Extract (strengthens and hydrates the epidermis, offering comfort and relief)
- Isostearyl Isostearate (ISIS) (reinforces the natural skin barrier)

#### secondary ingredients

- Liquid Crystal System (a delivery system providing increased moisturisation)

### Product benefits

- Optimum transdermal delivery
- Skin barrier repair
- Reduction in the signs of acne
- Reduction in redness and inflammation
- Inhibits the growth of micro-organisms on the skin
- Improved skin health

### Application technique

#### am and/or pm

- Apply to a clean, dry skin on the face, neck and décolleté after Nimue Conditioner or Nimue Pre & Post Serum
- Massage into the skin and allow to fully absorb
- Follow with Nimue Active Lotion/Gel (pm only) or Nimue Booster and prescribed day/night moisturiser\*

\* Consideration must be given to sensitised skin, making sure that it is not overstimulated. Commence with Nimue-TDS™ to assist in barrier repair for approximately 1-2 weeks before introducing Nimue Active Lotion/Gel or a Nimue Booster.
