

# ACTIVE TREATMENT

## Smart Micropeel for Sensitive Skin

30ml

pH3.5

This professional treatment peel is an extension of the core range for the Sensitive Skin Classification. It provides a dedicated soft-acid based treatment suitable for a sensitised and inflamed skin. The Smart Micropeel contains Saponins, Glycyrrhetic Acid and anti-inflammatory actives to provide a gentle peel that reduces skin inflammation. A Dermabiotic restores the skin microbiome.

### Active ingredients

#### primary ingredients

- 6% Mandelic Acid (exfoliation, rejuvenation and healing)
- 4% Lactobionic Acid (softens and smooths)
- Glycyrrhetic Acid (reduces inflammation)
- Daucus Carota Sativus (plant stem cell biotechnology) (rebalances skin microbiota, calms and reduces inflammation)

### Product benefits

- Skin rejuvenation and gentle exfoliation
- Softens and smooths the skin
- Balances the skin microbiome
- Improves barrier function
- Reduces and prevents erythema
- Calms the skin, reducing inflammation
- Optimises penetration of homecare products

### Application technique

- Shake bottle gently before use
- Decant approximately 3ml (13 pumps) of product into a clean glass bowl
- Using a dry Nimue brush, apply an even layer to the face, neck and décolleté
- Take caution around the delicate eye area, nostrils, and lips
- Leave on the skin for 3 min
- Apply Nimue professional Super Hydrating Mask after the 3 minutes, directly over Smart Micropeel and leave for a further 3-5minutes, depending on skin tolerance level
- Remove Smart Micropeel and Super Hydrating Mask with a lukewarm compress to neutralise
- Follow with after care protocol
