

# ACTIVE TREATMENT

## Phase 3 treatments

## Thermal Detox Peel

30ml

pH4.5

The Nimue Thermal Detox Peel is an effective deep cleansing, detoxifying and exfoliating flash treatment with a thermo-sensory mechanism to improve skin oxygenation.

### Active ingredients

- Foaming Agent Complex (deep cleanses, removes excess oils and impurities)
- Charcoal Powder (detoxifies and purifies)
- Warming Agent (increases oxygen and nutrient supply)
- Pumpkin Enzyme (exfoliates and moisturises)
- AHA's (provides light exfoliation)

### Product benefits

- Decreases impurities and excess oil
- Refines the pores
- Reduces congestion
- Softens fine lines and wrinkles
- Softens and smoothes skin texture
- Evens the skin tone
- Brightens a dull skin
- Increases skin radiance
- Increases skin hydration

### Application technique

- Decant 35 pumps (35 = 7ml) into a clean glass bowl.
- Use Nimue Thermal Detox Peel immediately after decanting
- Apply an even, thick layer to the face, neck and décolleté with a dry brush. Avoid the upper eyelid, area directly under the eyes, inner corner of the eyes and corners of the nose and lips.
- Communicate to client that a tingling sensation, followed by warmth and a bubbling action, will be experienced
- Leave on the skin for approximately 5-10 minutes, depending on tolerance levels, when bubbling action has stopped or when client no longer feels the warming sensation. Do not exceed specified time
- To aid with removal, first moisten the peel by gently massaging the skin with cool water
- Then, place 2-4 disposable compresses into a small Nimue rubber bowl and saturate with water
- Use 1 compress at a time for removal of peel, folding the compress into quarters for more effective removal
- Repeat with next 1-2 compresses, until most product has been removed
- Cleanse again with Nimue Cleansing Gel to remove any excess peel and impurities trapped by the charcoal
- Using the last compress, wipe over face, neck and décolleté to remove cleanser and excess peel
- Follow with Cyanoacrylate Super Fluid if required or for an Interactive Skin
- 4 treatments can be performed from the 30ml bottle when using 7ml per treatment. (7ml covers face, neck and décolleté)
