Client concern

“Because of my lifestyle and genetics, I am showing signs of ageing. I have fine lines and wrinkles, sagging, an uneven texture and complexion. I need a powerful, customized professional treatment to kick-start my skin and reverse the damage that has been done!”

Why does it work?

Retinol is a derivative of Vitamin A with powerful benefits.

Once Retinol has penetrated the skin, it is converted into Retinoic Acid, which works specifically on our cellular DNA to reverse the signs of ageing.

Retinol increases cell turnover, evens out texture and skin tone and corrects photo damage.

The Nimue solution

A Nimue certified skincare specialist can add the new Nimue Professional Retinol Super Fluid to any Nimue professional treatment.
