

ThermoFlash Peel

NEW!

A rapid, resurfacing flash DIY treatment, together with thermal technology, for use in the comfort of your client's home.

The **NEW** ThermoFlash Peel delivers instant results and can be applied when a quick radiance or exfoliation boost is needed.

In one application, your client will experience:

- Pore cleansing
- Skin detoxification
- Increase in skin circulation and oxygenation
- Light peeling
- Moisturisation

This peel provides a **super charged**, smoothing effect, revealing a natural radiance, and is ideal for clients who are unable to have a Nimue Professional Treatment before a special occasion or when their skin needs a boost. While it does not replace the resurfacing benefits of our professional treatments, it provides the skin with a **powerful at-home treatment solution**.

Suitable for all skin classifications (except Interactive Skin)

KEY INGREDIENTS

- **Warming Agent**
 - Relaxing effect with optimal warming sensation
- **Sorghum Bicolour Stalk Juice**
 - Provides an immediate and durable tightening effect
- **Salicylic Acid**
 - Oil-soluble BHA, excellent at loosening and removing ageing cells, oil and debris attached to the skin surface
- **Kaolin**
 - Absorbs excess oils, soothing effect
- **Glycolic Acid**
 - Promotes cell turnover and skin rejuvenation
- **Sodium Lactate**
 - Improves moisture retention, strengthens and repairs skin barrier
- **Phytosterols**
 - Soothing, anti-inflammatory effect with barrier function strengthening and repairing properties

EXPERT TIPS

- Convenient for use as an add-on to the Nimue skin health programme
- Quick and easy to use, all within 10 minutes
