Warming Agent

- “Smart Warming”
- Creates thermal sensory effects
- Warming sensation created
- Increases blood flow to skin surface
- Delivers oxygen and nutrients to cells
- Increases skin radiance

Nimue thermal detox peel ingredients

Warming Agents....a new trend in skincare

77% of consumers know that the product is working when they feeling a warming effect

64% of consumers believe a product is penetrating better when they feel a gentle tingling effect

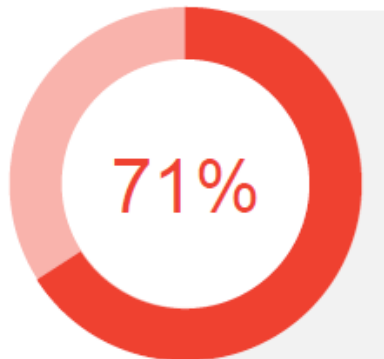

Source: *Cosmetic Ingredients Consumer Study*

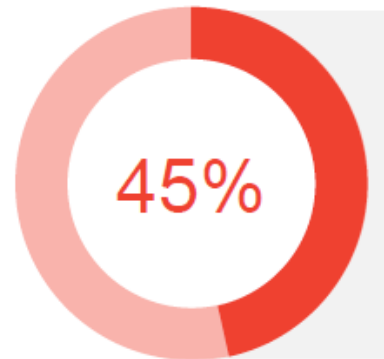

Nimue Thermal Detox Peel

Nimue thermal detox peel ingredients

of consumers would like to feel an intense warming sensation in skin care applications
(from 5-10 on a 0-10 intensity scale)

of consumers will choose a product that does not irritate as an additional benefit

Nimue thermal detox peel ingredients

3. Oxygenation

Warming Agent - a new trend in skincare

- Warmth delivers comfort and pleasant skin sensations
- Soothes and relaxes
- Increases the perception of efficacy
- Intense warming, but no heat or side effects!
- Warming perception dependant on concentration and location of warming receptors in the skin
- Intensity of warming sensation varies between clients

Nimue thermal detox peel ingredients

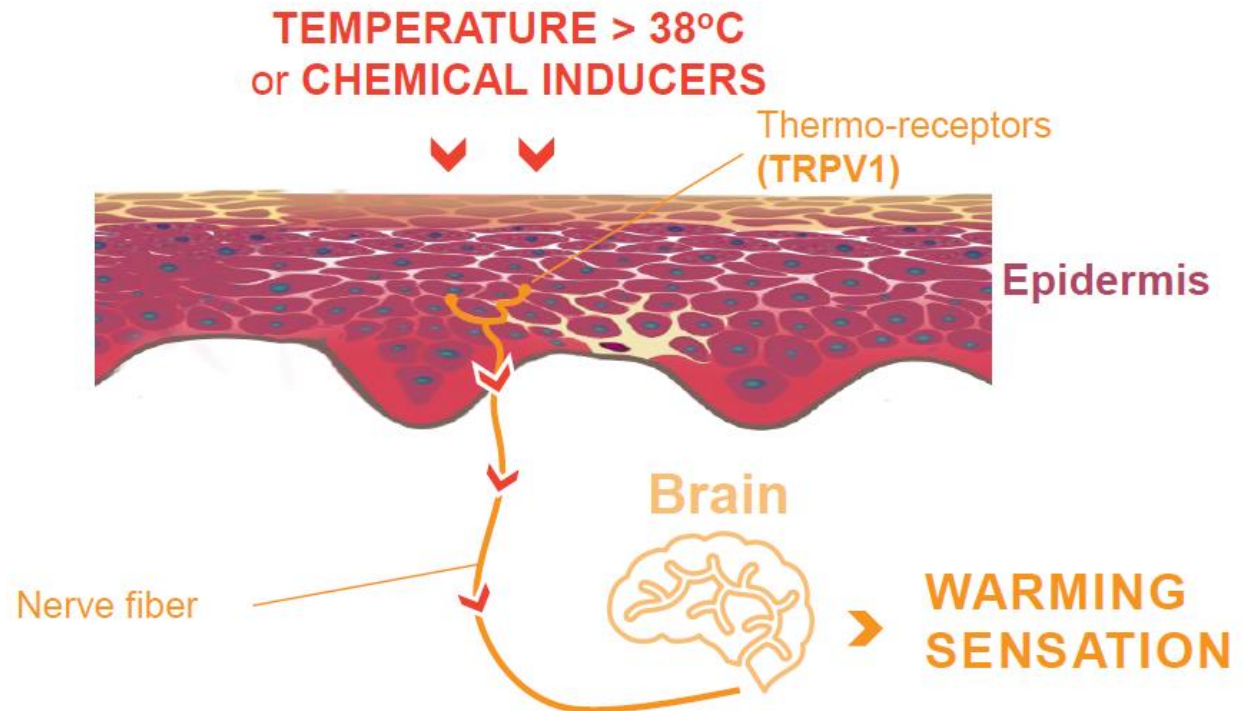

Warm temperatures or chemical inducers

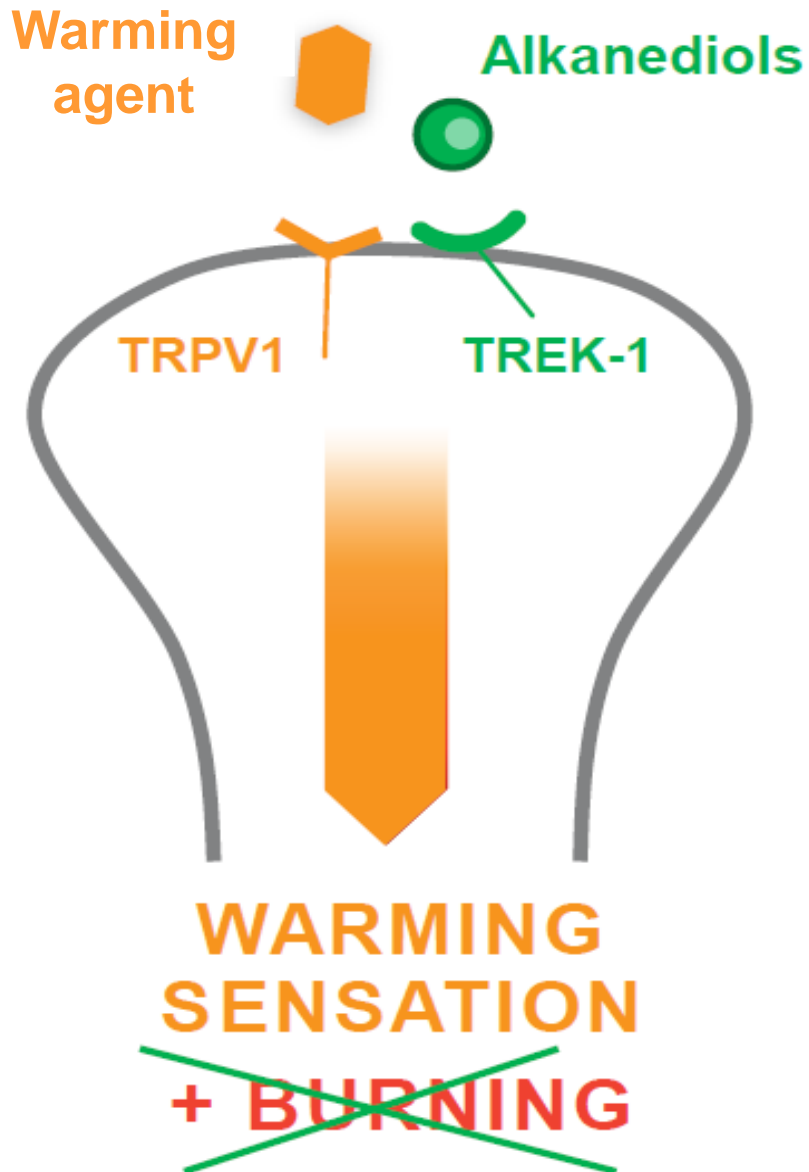

Activate thermo-receptors located on the skin sensory neurons

Transfer warming signals to the brain

Nimue thermal detox peel ingredients

Warming agent
activates TRPV1
thermo-receptor

Sends a nerve
signal to the brain

Optimal
heating/warming
sensation with no
burning or irritation

Nimue thermal detox peel ingredients

4. Exfoliation

Pumpkin Enzyme

- Gentle and effective exfoliator
- Pumpkin proteolytic enzymes softens protein bonds between dead cells
- Releases trapped bacteria and impurities
- Smooth, polished and even skin texture
- Provides intense moisturising benefits

Nimue thermal detox peel ingredients

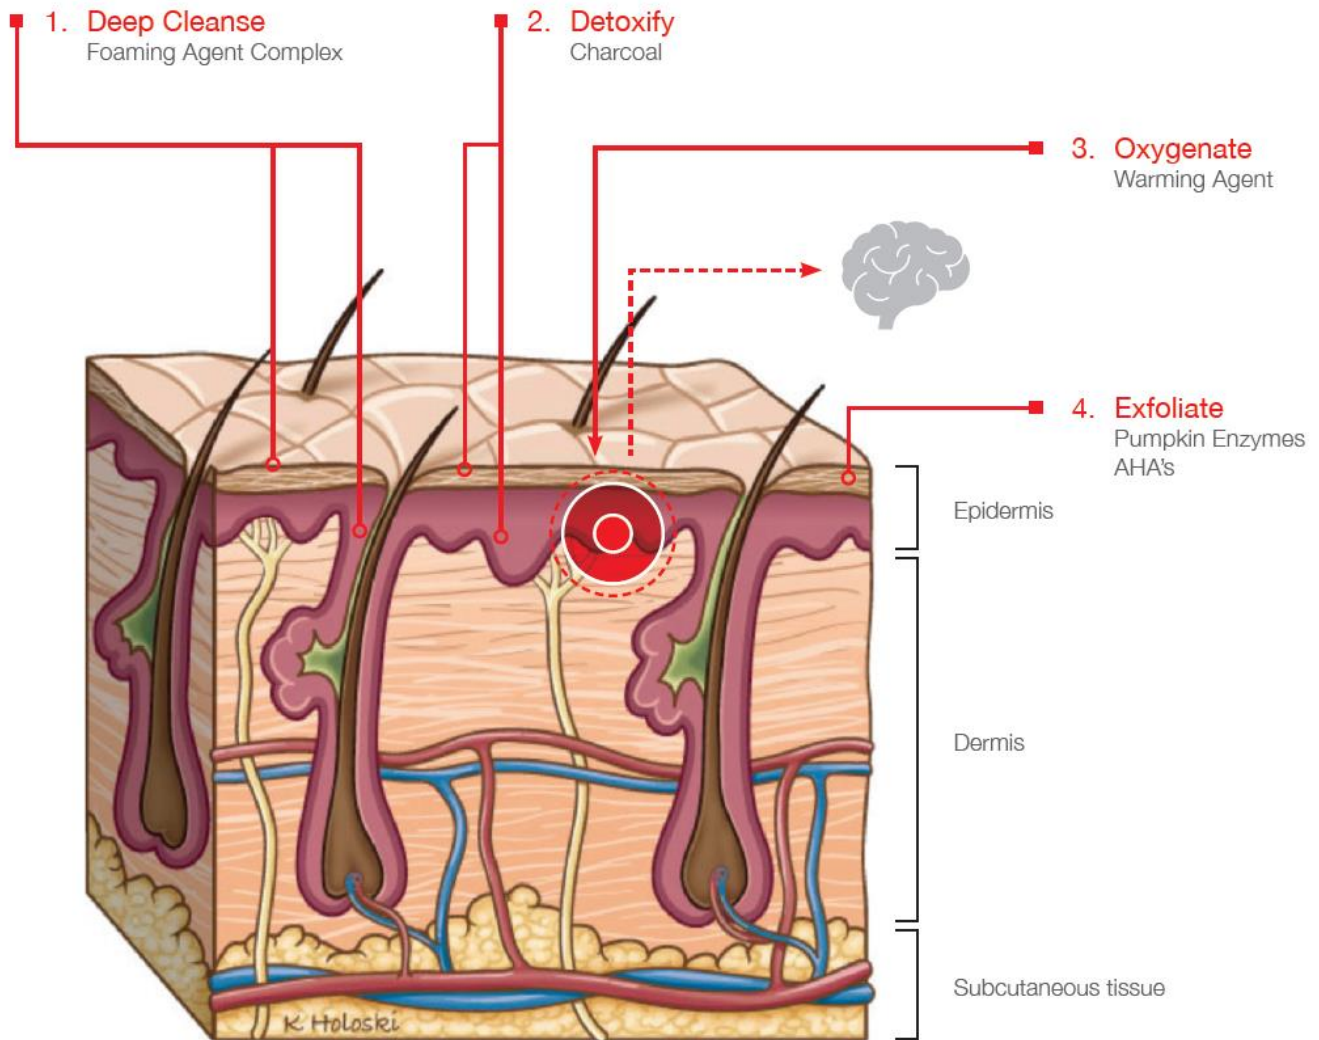

4. Exfoliation

AHA's

- Provides light exfoliation
- Dissolves the “glue” between cells
- Humectant action maintains skin hydration levels
- Results in a brighter, smoother, more even toned skin

Nimue thermal detox peel ingredients

Nimue Thermal Detox Peel

Nimue thermal detox peel

Nimue Thermal Detox Peel

7ml

pH 4.5

Active ingredients

- Foaming Agent Complex
- Charcoal Powder
- Warming Agent
- Pumpkin Enzyme, AHA's

I, _____ consent to the treatment known as _____ (select one of above treatments). The effect and nature of the treatment to be given as well as possible alternative methods of treatment, have been fully explained to me. I am advised that, though good results are expected, they cannot and are not guaranteed to be effective, nor can there be any guarantee against untoward results. I am fully aware of the risk, if any and accept that Nimue shall not be held responsible for any damage, loss or liability incurred or suffered resulting from my participation.

I have been informed fully and properly that, following any of the above treatment procedures, the following might occur:

- Some skin discomfort during and after the procedure such as, tingling, itching, burning, tightness, dry patches and flaking or peeling of superficial layer of the skin.
- Temporary skin reddening.
- Breakouts resulting from the treatment procedure, which can be managed with home care.
- These manifestations will gradually diminish over the course of a week. However, some clients might react differently and experience very few side effects or no flaking or peeling. Although rare, the skin may be uncomfortable and look like very bad sunburn. The flaking usually lasts about 3 to 7 days, although it might vary.
- I have been advised to follow the prescribed application of Nimue home care products and that without daily use of sunscreen the treatment for my condition might fail.
- Both the Salon and Nimue, where applicable, undertake to keep all of the information contained herein confidential and shall not disclose such information to any third parties, other than where reasonably required to do so by law or as otherwise authorised by the Client.

I understand that there is a small incidence of the reactivation of "cold sores" (herpes infection) in clients with a prior history of herpes. There is also an incidence of the flare up of acne-like lesions resulting from the peel.

Part 5 Professional Treatment and Procedure

standard requirements for work station

standard requirements for work station

Nimue thermal detox peel

General Precautions

- Eliminate any contra-indications and/or precautions
- Clients must remove soft contact lenses prior to treatment
- Avoid holding pod with Nimue Thermal Detox Peel above client's eyes
- Avoid application of active products on client's lips and nostrils as it dries the mucous membranes
- Client should keep eyes closed during treatment. In cases of contact with eyes, flush with eye drops and water
- Use latex/vinyl gloves for all acid based treatments
- Always explain to clients what to anticipate and the various sensations
- Cyanoacrylate Super Fluid may be used for sensitivity

Nimue thermal detox peel

Contra-indications

- Very sensitive skin and severe capillaries
- Dermatitis/Eczema
- Use of Cortisone, Isotretinoin, Accutane, skin resurfacing lasers or deep peeling procedures in past 8 weeks
- Botulinum toxin and fillers in past 4 weeks
- Active skin lesions or any skin infection
- Waxing, electrolysis, shaving or use of depilatory creams in past 3 days
- Uncontrolled diabetes - perform a patch test to determine skin sensitivity
- Do not use on a visibly compromised skin barrier

time for practical
