

Nimue Active Resurfacing Wipes

The known efficacy of the Nimue Active Lotion and Active Gel just got even better with a convenient wipe system.

Nimue Active Resurfacing Wipes are a solution for targeted, powerful skin rejuvenation through a high concentration of Alpha Hydroxy Acids and soothing, rebuilding actives, Vitamin B5 and Allantoin.

The wipes not only further stimulate the skin through a buffing action when applying, but also serve as an on-the-go solution for skincare science.

The Active Resurfacing Wipes provides high purity acids for radiant and softened skin. The skin is hydrated, plump and smoothed over time with minimal irritation.

Convenient for home care use, when travelling and designed to be used as a targeted treatment in the evenings for existing Nimue users.

The biodegradable bamboo cloth wipes are in single dose sachets saturated with a liquid solution of Alpha Hydroxy Acids and additional actives.

PRODUCT BENEFITS

- Peels the skin thereby removing dead skin cells
- Accelerates skin renewal
- Smoother and revitalised skin
- Deep cleanses and detoxifies the skin
- Reduces oiliness and breakouts
- Promotes an even skin tone
- Creates a radiant, glowing and smooth appearance
- Soothes and repairs the skin barrier
- Improves dull, lifeless skin
- Resurfacing and refinement of skin texture

KEY PRIMARY ACTIVE INGREDIENTS

GLYCOLIC ACID:

- High purity Glycolic Acid penetrates the skin rapidly and causes controlled desquamation
- Boosts cell turnover, reducing the appearance of mild breakouts
- Normalises keratinisation and decreases epidermal thickness
- Increases dermal Hyaluronic Acid and collagen gene expression

LACTIC ACID:

- An AHA that hydrates the skin, boosting the skin's natural moisturising factor
- In addition to smoothing the skin, it also balances the microbiome, promoting healthy biome creation on the skin's surface.

CITRIC ACID:

- High purity Citric Acid penetrates slower than Glycolic Acid
- Increases the skin cells' renewal rate, brightening the complexion and normalising turnover for a more even skin tone

SECONDARY ACTIVE INGREDIENTS

ALLANTOIN:

- A skin conditioning powerhouse that improves the skin's moisture retention for a skin smoothing effect
- Fights the appearance of ageing and skin damage
- Deeply nourishes the skin
- As an effective anti-irritant, it protects the skin and reduces itching and discomfort often experienced with chemical exfoliation

PANTHENOL:

- A well-known Vitamin B₅ that hydrates and soothes the skin
- Known for its use in wound healing formulations
- Panthenol conditions the skin, rebuilds the barrier and calms the skin, building the skin's resilience over time

INDICATIONS

- Environmentally Damaged Skin
- Hyperpigmented Skin
- Problematic Skin

CONTRA-INDICATIONS

- Irritated Skin
- Skin Lesions
- Skin Cancer
- Directly after Facial Waxing, Electrolysis, Dermaplaning, Microdermabrasion, Laser Treatments

USAGE

- PM only
- 3-4 times per week after Nimue Cleanser and Conditioner
- Wipe over the entire face and neck area
- Avoid the delicate eye and lip area and irritated or sensitive skin
- Discard wipe after use
- Continue with Nimue night cream and Nimue SPF in the morning
- **No pre-conditioning is required**
- **May be used from the start of using Nimue products due to the addition of Panthenol and Allantoin** (*Therapist discretion for each client is advised upon*)
