

Re-Hydration Range Frequently Asked Questions

The ingredient Hyaluronic Acid has been on the market for a long time. Why is Nimue now using it in dedicated Hyaluronic Acid products?

Good support for dryness and dehydration has always been a key part of skin health. New, smart technology in Hyaluronic Acid actives, allows for more unique product development providing superior hydration and moisturisation and additional skin benefits.

Can the Hyaluronic Ultrafiller Serum and the Hyaluronic Oil be used in the same application am and/or pm?

Yes, they can be used together

Layering can be very beneficial in severe dryness and dehydration, especially during extreme weather and temperature changes.

At what stage of my client's skin routine will the Hyaluronic Ultrafiller Serum be applied?

AM:

Use after Nimue Cleanser and Conditioner

Apply the Hyaluronic Ultrafiller Serum and follow with Nimue Moisturiser (Day) and Nimue SPF

PM:

Use after Nimue Cleanser and Conditioner

Apply the Hyaluronic Ultrafiller Serum and follow with Nimue Moisturiser (Night)

At what stage of my client's skin routine will the Hyaluronic Oil be applied?

AM:

Use the Hyaluronic Oil **after** Nimue Moisturiser (Day) and follow with Nimue SPF

(It is applied in this order to allow the actives in the Nimue Core to penetrate first. The oil will form a hydrating and moisturizing layer on the surface of the skin. The oil will also enhance the penetration of the actives in the core. Nimue SPF product will always be the last product to apply for sun protection).

PM:

Use the Hyaluronic Oil **after** Nimue Moisturiser (Night)

Re-Hydration Range Frequently Asked Questions

Can the Hyaluronic Ultrafiller Serum and the Hyaluronic Oil be used in the same application as Active Gel/Active Lotion?

No, they may not be used in the same application

Active Gel/Active Lotion will always be used on alternate evenings to optimise the efficacy of this concentrated treatment product. The Hyaluronic Ultrafiller Serum and Oil is also concentrated, therefore caution should be taken not to overload on actives and overstimulate the skin.

Can the Hyaluronic Ultrafiller Serum and the Hyaluronic Oil be permanent in my client's skin routine?

Hyaluronic Ultrafiller Serum

Yes, if so desired. The skin must be monitored for changes and primary needs must be addressed, which may vary from time to time.

Should the primary needs change, an alternate serum might provide more specific benefits based on the skin condition.

Hyaluronic Oil

The Oil is suitable for more periodic use ie. during seasonal changes, and is not recommended for permanent use.

Can the Hyaluronic Ultrafiller Serum be used in conjunction with Skin Refirmer?

Yes, they can be used in conjunction

The Hyaluronic Ultrafiller Serum has an anti-ageing effect due to the MMP Inhibitor, Acetylated Hyaluronic Acid.

Skin Refirmer contains anti-ageing peptides that relaxes the muscles forming expression lines, as well as the MMP Inhibitor, Manilkare Multinervus.

These ingredients do not oppose each other.

The Hyaluronic Ultrafiller Serum optimizes hydration to compliment the skin rejuvenation derived from the Skin Refirmer.

Can the Hyaluronic Ultrafiller Serum and the Hyaluronic Oil be used during the Transitional Period?

Yes

Both Hyaluronic Ultrafiller Serum and the Hyaluronic Oil provide enhanced skin comfort. It is also ideal post peeling to alleviate dryness and tightness.

Re-Hydration Range Frequently Asked Questions

Is the Hyaluronic Oil the same as Nimue Cell Hydrating Complex?

No, it is not the same

The Hyaluronic Oil contains the first oil soluble Hyaluronic Acid that can be incorporated into an oil formulation. It is more effective in addressing dryness and dehydration by providing increased moisture and hydration with the latest version of Hyaluronic Acid used.

The aroma may be similar as certain essential oils used in Cell Hydrating Complex were selected and incorporated into the Hyaluronic Oil.

My client currently has Nimue Pre & Post Serum. She has just purchased the Hyaluronic Ultrafiller Serum. In what part of her skin routine would she apply it?

Am:

After Nimue Cleanser and Conditioner, apply **Nimue Pre & Post Serum** to focus specifically on barrier repair and protection.

Next, apply the **Hyaluronic Ultrafiller Serum** and follow with Nimue Moisturiser (Day) and Nimue SPF

Pm:

Same as above, without the application of Nimue SPF

Can the Hyaluronic Acid Super Fluid be used during a Nimue Thermal Detox Peel or a Nimue Smart Resurfacer Treatment?

Yes, it can be used during these treatments

Nimue Thermal Detox Peel

Hyaluronic Acid Super Fluid WILL NOT be mixed into Thermal Detox Peel, but may be used *under* Aftercare Hydrator to boost skin hydration and radiance.

Nimue Smart Resurfacer

Hyaluronic Acid Super Fluid WILL NOT be mixed into Smart Resurfacer, but may be used *under* Alginate Mask or *after* Collagen Face Film to optimise and boost skin hydration and radiance.
