

Nimue ThermoFlash Peel

The new Nimue ThermoFlash Peel is a rapid, resurfacing flash DIY treatment for homecare that delivers instant results and can be applied when a quick radiance or exfoliation boost is needed. The result is a radiant, tightened and glowing skin without any downtime or side effects.

The Nimue Glyco Mask was launched a decade ago. After 10 years of success, we have upgraded the mask to transition to a very effective and much needed powerful **Do-It-Yourself** home peel.

DIY, at-home skin care will continue to be a prominent trend and is gaining traction in this new world as consumers have increased time and desire a results-orientated product that can be used at home. According to research, it will be a long-lasting trend that is here to stay.

GLYCO MASK

- Rapid flash mask treatment.
- Applied when a quick radiance or exfoliation boost is needed.
- A clay mask that will purify the skin whilst the actives will allow for immediate tightening and exfoliation whilst moisturising.

Result is a radiant and glowing skin

THERMOFLASH PEEL

- A rapid flash resurfacing DIY treatment
- Delivers instant results and can be applied when a quick radiance, mild resurfacing or exfoliation boost is needed.
- A warming agent in a creamy clay base that will purify the skin whilst the actives will allow for immediate tightening, peeling and moisturising of the skin.

Result is a radiant, tightened, exfoliated and glowing skin, without any downtime or side-effects.

PACKAGING

10ml Tube

30ml Tube

SKIN CLASSIFICATION AND INDICATIONS

- Environmentally damaged skin
- Hyperpigmented skin
- Problematic skin
- Dull, lifeless skin

- Environmentally damaged skin
- Hyperpigmented skin
- Problematic skin
- Dull, lifeless ageing skin
- Enlarged pores
- Lines and wrinkles
- Dry skin
- All ages, from 20 years upwards

KEY BENEFITS

- Exfoliates the skin, creating a radiant, glowing and smooth appearance
- Reduces fine lines and wrinkles
- Immediate skin tightening effect
- Improves roughness and uneven skin colouring
- Moisturises and deep cleanses

- Deep cleanses the surface and in the pores
- Detoxifies
- Resurfaces the skin, removing dead skin cells
- Thermal action with unique mechanism results in increased skin circulation and oxygenation
- Moisturises the skin creating a radiant, glowing and smooth appearance
- Firms the skin
- Immediate skin tightening effect for a toned appearance
- Soothes and repairs the skin barrier
- Improves dull, lifeless skin

One application will include rapid pore cleansing, skin detoxification, oxygenation and a light peeling.

This peel will not deliver skin resurfacing benefits like all other Nimue professional peels, but does provide a super charged smoothing boost, revealing a natural radiance, all within 10 minutes.

KEY ACTIVE INGREDIENTS (PRIMARY AND SECONDARY)

PRIMARY INGREDIENTS

- **Amphoteric Glycolic Acid** (gentle exfoliating)
- **Salicylic Acid** (exfoliating)

SECONDARY INGREDIENTS

- **Sorghum Bicolour Stalk Juice** (tightening)
- **Kaolin** (deep cleansing)
- **Shea Butter** (moisturising)
- **Brassica Campestris** (barrier repair)

Oil in water emulsion

PRIMARY INGREDIENTS

- **Warming Agent** (Thermal Ether - Vanillyl Butyl Ether): Relaxing effect with optimal warming sensation
- **Sorghum Bicolour Stalk Juice**: Provides an immediate and durable tightening effect and results in a micro lifting and smoothing effect on the skin.
- **Salicylic Acid**: Oil-soluble BHA that exfoliates on the skin surface and in the pores

SECONDARY INGREDIENTS

- **Kaolin**: Absorbs excess and soothes the skin
- **Glycolic Acid**: Provides an instant flash activity and exfoliating effect.
(The Amphoteric Glycolic Acid is a slow release system and activity would not be fast enough for this peel)

- **Sodium Lactate:** Improves skin moisturisation for up to 4 hours after use.
- **Phytosterols:** Naturally based compound of Phytosterols derived from avocado and olive fruit oils. Soothing, anti-inflammatory effect with barrier function strengthening and repairing properties.

Oil in water emulsion
